

Snow Machine Rental

Do you want to build a snowman? An all time party hit - snow machines simulate falling snow, creating a magical effect. Snow liquid has the look of real snow falling, however is actually a dense foam! It's not a "snow making machine" and doesn't build up on the ground. The "snowflakes" evaporate leaving no mess to clean up!

Cost: R650 (excluding collection & delivery).
Additional 5L bottles are R250 each.

Optional "Snowy" Extras:

- 1.8m Inflatable Snow Man: R250
- 1.5m LED Winter Tree Rental: R275 per tree
- Snowflake Projector Light Rental: R350
- Snowball Lights Rental: R60 for 2 meters of lights
- Blue Uplights: R175 each
- White Jumping Castle: R700

NEED TO KNOW

The machine comes standard with the first 10 litre bottle of liquid (which will last approximately 2-3 hours, depending on what setting you put it on)

We require a power outlet within 5m of where you want the machine positioned.

The machine has a full volume & half volume switch a graduated volume knob on the remote so you can run it at different volumes.

Dry foam provides a self-clearing falling snow, which is biodegradable and non-toxic.
